

Enhancing ecosystem services mapping for policy and decision making

Welcome to the final Conference

EU Horizon 2020 Coordination and Support Action

Welcome to Brussels

[slide from ESMERALDA Kick-off meeting Kiel, 05/2015]

ESMERALDA welcomes delegates from

- ★ 27 EU member states
- ★ Switzerland, Norway and Israel
- ★ EU candidate states (Macedonia, Serbia)
- ★ EU outermost regions (Azores)
- ★ European Commission DG RTD, DG ENV, DG AGRI
- ★ European Commission Joint Research Centre (JRC)
- ★ European Commission Executive Agency for SMEs (EASME)
- ★ European Environment Agency (EEA)
- ★ European Anglers Alliance (EAA)
- ★ European Topic Centre / Biodiversity
- ★ Eurac Research
- ★ Institute for European Environmental Policy (IEEP)
- ★ IUCN, IUCN Europe
- ★ Confederation of European Forest Owners
- ★ UNEP -WCMC
- ★ Ecosystem Services Partnership (ESP)
- ★ Stakeholders from the Cities of Antwerp, Blagoevgrad and Trento

What is ESMERALDA?

- ★ An EU Horizon 2020 Coordination and Support Action

- ★ A Pan-European network of ecosystem services specialists and stakeholders

- ★ With special focus on enhancing ecosystem services mapping

- ★ Dedicated to Target 2 Action 5 of the EU Biodiversity Strategy

What is ESMERALDA?

★ Target 2, Action 5

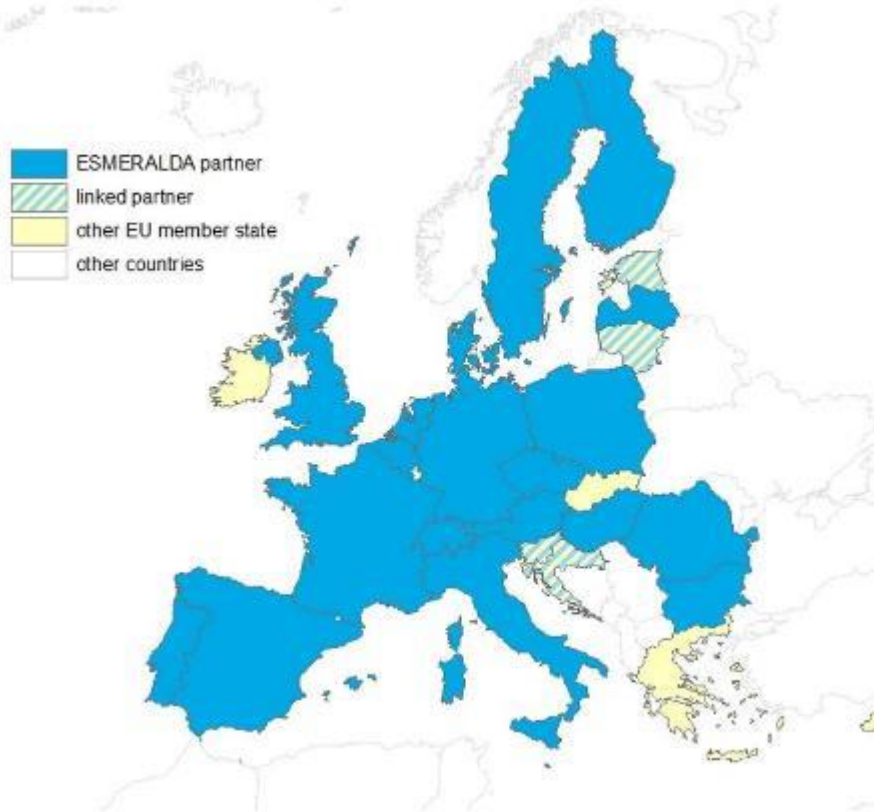

*“to improve knowledge of ecosystems and their services in the EU (Action 5) – the member states shall **map and assess the state of ecosystems and their services** in their national territory by 2014, assess the economic value of such services, and promote the integration of these values into accounting and reporting systems at EU and national level by 2020”*

<http://ec.europa.eu/environment/nature/biodiversity/comm2006/2020.htm>

ESMERALDA network

★ At the beginning of the project (2015)

- 25 partners
- from 19 EU member states
- Switzerland

★ Toward the end of the project (2018)

- 37 partners
- from all 28 EU member states
- Switzerland, Norway and Israel

ESMERALDA network

 Leibniz Universität Hannover, Germany (LUH)	 Paris-Lodron University Salzburg, Austria (PLUS)	 Foundation for Sustainable Development, the Netherlands (FSD)	 University of Copenhagen, Denmark (UCPH)

★ A real pan-European network

The **ESMERALDA** networking approach

- ★ Create and maintain a strong network of **ecosystem services specialists**
- ★ Harnessing existing networks (e.g. **Ecosystem Services Partnership ESP**)
- ★ Inputs from the ESP Thematic Working Group on Mapping Ecosystem Services
- ★ Strong interaction with the EU Working Group on Mapping and Assessment of Ecosystems and their Services (**MAES**)
- ★ Make use of **existing related projects** (e.g. FP7 projects OpenNESS, OPERAs, MESEU)
- ★ Identify and involve **relevant stakeholders** from science, policy and practice at EU and national levels
- ★ Regular **ESMERALDA Workshops** across Europe ...

ESP
Ecosystem Services Partnership

ESMERALDA Workshops

★ Project Kick-off meeting Kiel, DE, 05/2015

Project Kick-off Meeting

Public project launching
and internal activity arrangements

04-07 May 2015

Kiel, Germany

ESMERALDA

Enhancing ecosystem services mapping
for policy and decision making

This project receives funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 642067.

ESMERALDA Workshops

- ★ Project Kick-off meeting Kiel, DE, 05/2015
- ★ Stakeholder Workshop Riga, LV, 10/2015

ESMERALDA stakeholder workshop on ecosystem service mapping and assessment in EU member states at national level
- Identified gaps and possible solutions-

PROGRAMME

Time: 13-16 October 2015

Location: BELLEVUE Park Hotel Riga, Slokas Street 1, LV-1048, Riga, Latvia
<https://www.hotelbellevue.lv/en>

Outline of the workshop programme:

13 October 2015, Tuesday	Arrival day: workshop welcome reception at 19:00
14 October 2015, Wednesday	Workshop (full day)
15 October 2015, Thursday	Workshop (full day)
16 October 2015, Friday	Field excursion to Ķemeri National Park (half day)

Daily workshop programme can be found in the next pages

For further information of the workshop, please contact:

Leena Kopperoinen, Finnish Environment Institute SYKE, tel. +358 295 251 296,
email: Leena.Kopperoinen@ymparisto.fi

For practical information, like venue, travel etc, please contact:

Anda Ruskule, Baltic Environmental Forum BEF - Latvia, tel. +371 2922 2324, email:

Anda.Ruskule@bef.lv

Dace Strigune, Baltic Environmental Forum BEF - Latvia, tel. +371 29747336, email:

Dace.Strigune@bef.lv

1st MAES-OR&OCT's Workshop
Ponta Delgada, Azores, 28.02. – 03.03.2017

Workshop	Mapping and Assessment of Ecosystem and their Services (MAES) in EU's Outermost Regions and Overseas Countries & Territories (MAES-OR&OCTs)
Background:	The aim of this Workshop is to take stock of the progress made in the EU's outermost regions and overseas countries and territories (OR&OCTs) on assessing ecosystem conditions and biodiversity. Much information has been gathered in regional "ecosystem profiles" ¹ that have been developed in a participatory way by regional hubs established in each region within the BEST ² initiative. Available ecosystem profiles can be harnessed, for example as data and information basis for Mapping and Assessment of Ecosystems and their Services (MAES) ³ . Further focus should be laid on mapping and assessing marine areas and their ES. The ESIMERALDA ⁴ project has experience from implementing, supporting and coordinating MAES-related activities in all EU member states, EU enlargement and associated countries. This coordination and technical experience will be used to successfully implement and carry out MAES also in the OR&OCTs' and in marine areas.
Structure:	The Workshop will contain different blocks, including: <ul style="list-style-type: none"> - General introduction of MAES and ESIMERALDA's implementation strategy; - Introduction of OR&OCTs', ecosystem profiles and peculiarities; - Technical sessions on mapping ecosystem and their services, methods, available data, practical training and an excursion - Discussions and plans on MAES implementation in OR&OCTs
Workshop idea:	To share knowledge and experience, to initiate MAES activities and to establish a respective supporting and coordination scheme in the OR&OCTs' and marine areas.
Location:	The meeting will take place at Department of Biology, University of the Azores, Rua Madre de Deus, 9501-803 Ponta Delgada, São Miguel Island, Azores, Portugal.
Dates:	February 28 th (arrival day) – March 03 rd , 2017

ESMERALDA Workshops

- ★ Altogether 11 Workshops across Europe were organized
- ★ They were a very efficient mean of interaction between ESMERALDA consortium members, other scientists, stakeholders and case study people
- ★ Main ESMERALDA outcomes were initialized/created during Workshops
- ★ Workshops needed a lot of resources (time and budget) to be organized
- ★ Huge inputs from case studies and other project in EU member states and involved staff, often beyond ESMERALDA budget
- ★ High workload on ESMERALDA Executive Board members (26 meetings until now)

... but it was **definitely worth the efforts** in order to achieve ESMERALDA's objectives and targets

ES mapping & assessment strategies

for EU member states

'Flexible methodology'

for pan-European, national and regional ES mapping and assessment

Test this methodology

in case studies across European regions and themes

Mobilise relevant actors

from science, policy, practice and society involved in ES

Enable actors in EU member states

to fulfil their tasks of EU BD Strategy's Target 2 Action 5 /

All ESMERALDA tasks and related actions are closely interlinked and build upon each other!

Milestone 09: EU Member State Fact sheets

Public documents, available on BISE:

http://biodiversity.europa.eu/maes/maes_countries

The screenshot shows the BISE website interface. At the top, there is a navigation bar with links for HOME, ABOUT BISE, CONTACT US, and SITEMAP, along with a search box and a Log in button. Below this is a main menu with categories: Topics, Policy, Data, Knowledge, Countries, and Networks. The current page is titled "Home » Mapping and Assessment of Ecosystems and their Services (MAES) » MAES-related developments in the European Union".

On the left side, there is a "Quick links" section with a list of countries and the European Union: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, European Union, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, and United Kingdom.

The main content area is titled "MAES-related developments in the European Union" and includes social media sharing buttons for Twitter and Facebook. The text states: "Target 2 Action 5 of the EU biodiversity strategy to 2020 states that 'Member States, with the assistance of the Commission, will map and assess the state of ecosystems and their services in their national territory by 2014, assess the economic value of such services, and promote the integration of these values into accounting and reporting systems at EU and national level by 2020.' In order to deliver Action 5 the Working Group MAES (Mapping and Assessment of Ecosystems and their Services) was established in 2012 under the Common Implementation Framework (CIF)."

Below the text, there is a map of Europe with a legend titled "Report on MAES-related developments". The legend indicates:

- Updated (Dark Green)
- Not updated (Light Green)
- Not available (White)
- Outside data coverage (Grey)

 The map shows that several EU member states are marked as "Updated" (dark green), while others are marked as "Not updated" (light green). Some countries are marked as "Not available" (white), and areas outside the EU are marked as "Outside data coverage" (grey).

ES mapping & assessment strategies

for EU member states

Deliverable 2.1 (Nov 2015): Clustering of EU Member States according to their prerequisites and needs to perform ES mapping and assessment.

Public report, available at:

<http://esmeralda-project.eu/documents/1/>

ES mapping & assessment strategies

for EU member states

ESMERALDA EU MAES barometer (03/2018)

- ★ Updated twice per year together with MAES WG meetings
- ★ Now all (almost) EU Member states have implemented MAES activities

Enable actors in EU member states

to fulfil their tasks of EU BD Strategy's Target 2 Action 5 /

Selected gaps for MAES implementation in EU member states identified by ESMERALDA

- ★ Lacking engagement of national authorities in the MAES process
- ★ Unsatisfying stakeholder involvement in the MAES process
- ★ Gaps in capacity and resources to carry out MAES in the country

Deliverable 2.2 (Feb 2016): ES mapping and assessment gaps in EU member states and recommendations to overcome them

Public report, available at:

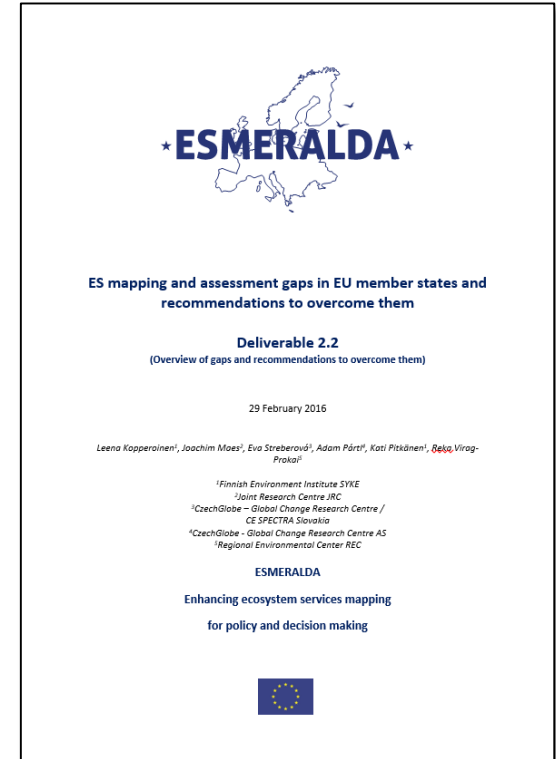

<http://esmeralda-project.eu/documents/1/>

Enable actors in EU member states

to fulfil their tasks of EU BD Strategy's Target 2 Action 5 /

Selected recommendations:

- ★ Justification (e.g. by good case examples)
- ★ Communication (e.g. translate complex findings for target groups)
- ★ Capacity building (e.g. education of transdisciplinary experts)
- ★ Technical support (e.g. data use; guidance for methods)
- ★ Join forces – meet and map – network!

Deliverable 2.2 (Feb 2016): ES mapping and assessment gaps in EU member states and recommendations to overcome them

Public report, available at:

<http://esmeralda-project.eu/documents/1/>

'Flexible methodology'

An operational framework for Mapping and Assessment of Ecosystem Services (MAES)

▼ Benjamin Burkhard, Fernando Santos-Martin, Stoyan Ne...

Abstract ▲

Mapping and Assessment of Ecosystems and their Services (MAES) is a key component of the European Biodiversity Strategy to 2020. It aims to map and assess the state of ecosystems and their services, and to integrate this information into policy-making. Therefore, an interdisciplinary approach is required for coordinating these activities. This paper describes the European Commission's MAES pilot project, which focuses on the identification of relevant ecosystem types, ecosystem characteristics, and the development of results. This framework can be used to guide involved scientists, and to coordinate related tasks of the process.

Mapping of nutrient service supply and demand in Schleswig-Holstein

▼ Sabine Bicking, Benjamin Burkhard

Abstract ▲

This study deals with one of the... guarantee sustainable land management... ecosystem service. Unsustainable land use, for example, result in eutrophication which... state of our water bodies. In the first step of research, the potential supply and demand of nutrient regulation were assessed and mapped at two different spatial scales: the state of Schleswig-Holstein (regional scale) and the Bornhöved Lakes District (local scale). The assessment was undertaken for nitrogen, as an exemplary nutrient. Subsequently, the supply and demand, combined with the nitrate leaching potential and the nitrate concentration, were incorporated into a correlation analysis. The data were processed with varying pre-processing and spatial resolutions. The statistical analysis data with low resolution leads to more uncertain results. Decreasing the resolution of the data to a higher resolution results in more precise results.

Methodological aspects of ecosystem service valuation at the national level

▼ David Vačkář, Ioanna Grammatikopoulou, Jan Daněk, Eliška Krkoška Lorencová

Abstract ▲

Ecosystem service valuations focusing on the assessment of ecosystem service values in space and time have recently been receiving considerable attention. Ecosystem service valuation data are critical for developing national ecosystem accounts and for assessment of costs and benefits associated with national strategies and plans. In this article, we discuss selected methodological aspects of ecosystem service valuation at the national level for the Czech Republic. We present a classification of ecosystems based on CORINE Land Cover and Consolidated Layer of Ecosystems of the Czech Republic. The focal point of our article is a systematic review of ecosystem service values. A systematic review requires a standardised protocol for incorporation of valuation studies. To illustrate the proposed methodology, we conducted a search of ecosystem service valuation studies at the European level. While there is a significant number of ecosystem service valuation studies,

On the importance of a broad stakeholder network for developing a credible, salient and legitimate tiered approach for assessing ecosystem services

▼ Bettina Weibel, Sven-Erik Rabe, Benjamin Burkhard, Adrienne Grêt-Regamey

Abstract ▲

As the concept of ecosystem services is being operationalised and implemented in policies, a better guidance on the selection of suitable methods for ecosystem services mapping and assessment is needed to allow more sound, transparent and comparable processes. A vast range of assessments focusing on different sets of ecosystem services at various scales is existing and the applied methods cover different disciplines from ecology to economy and social sciences. This complicates the assessment of single or bundles of ecosystem services across spatio-temporal scales and requires a broad expertise. A tiered approach for ecosystem services assessment allows selecting a specific question at a given scale. In this article, we discuss the development of a tiered approach for assessing ecosystem services in various

tools for ecosystem services mapping... types or land cover types to ecosystem... capacity, supply, use, demand or other... alternative ES scoring that can meet general... erent scales. Nevertheless, guidance is... to address some of the biases and limits... pose a set of guidelines to produce ES... ng literature and experience acquired... assessments carried out in France. 'Flexible methodology'

for pan-European, national and regional ES mapping and assessment

- ★ ESMERALDA developed a 'flexible methodology' that provides guidance and **innovative building blocks** for the implementation of the EU Biodiversity Strategy's Target 2 Action 5 in all EU member states

- ★ Methods **flexible** enough to be applied in all EU member states (including outermost regions, marine areas and specific biomes)
- ★ The **multi-tiered** approach considers different methods (biophysical, social, and economic) at different levels of detail and complexity and can be applied according to specific needs, data and resources availability

ESMERALDA has been very productive, key outcomes are:

- ★ **Deliverable reports** (i.e. those on methods, case studies and EU member states)
- ★ **Country fact sheets**
- ★ **Methods application cards**
- ★ **Case study booklets**
- ★ **Methods data base**
- ★ Experience on EU-wide **stakeholder identification, network creation** and maintenance
- ★ Open access **Mapping Ecosystem Services textbook**
- ★ Open access **publications**, e.g. from ESMERALDA Special Issue in *One Ecosystem*
- ★ **Glossary** on ecosystem service mapping-related terms

... how to integrate and link all these different outcomes and make them available open access, also in a long-term?

★ ESMERALDA MAES Explorer

<http://www.maes-explorer.eu/>

The screenshot shows the website's navigation bar with links for Home, Full Report, About Esmeralda, and Contact us, along with a search bar and numbered tabs 1 through 7. The main header features a map of Europe with the text '★ ESMERALDA ★'. Below this, a welcome message states: 'Welcome to the Guidance on Ecosystem Service Mapping and Assessment by ESMERALDA, a support and coordination action funded under the Horizon 2020 programme for research and innovation of the European Commission.' It further explains that the website provides guidance for Action 5 of the EU Biodiversity Strategy to 2020. A section titled 'Questions and Themes' contains seven numbered icons with corresponding text: 1. 'What kind of questions do stakeholders have?', 2. 'Identification of relevant stakeholders', 3. 'Network creation and involvement of stakeholders', 4. 'Mapping and assessment process', 5. 'MAES case study applications', 6. 'Dissemination and communication', and 7. 'Implementaion'. A button at the bottom of this section says 'Download PDF of full report.' The footer includes the text 'Follow ESMERALDA' and social media icons for Twitter, Facebook, and LinkedIn.

Mapping and assessment process

The ecosystem services mapping and assessment process is the technical/methodological core of MAES. Mapping refers, in this context, to the spatial delineation of ecosystems as well as their condition and the services they supply through the spatial integration of a wide range of methods and data sets. Assessment includes the analysis and review of (existing) information derived from research for the purpose of helping someone in a position of responsibility to evaluate possible actions or think about a problem. In ESMERALDA, the focus was on ecosystem services mapping and assessment, less on ecosystem types, condition or accounting, the other relevant parts for MAES.

ESMERALDA developed a 'flexible methodology' for ecosystem services mapping and assessment providing the building blocks for regional, national and pan-European assessments. This methodology has been built on existing research, related projects, methods and databases. The results of the comprehensive ESMERALDA review of existing studies can be explored by the MAES methods Explorer, a searchable online database as well as the detailed Methods Documentations of biophysical, economic and social methods and possible Methods Integration. Finally, ESMERALDA is providing a useful overview of selected Methods' Applications and links to the ESP Visualisation tool, an online platform where ecosystem service maps can be shared.

★ Online data base and query tool on ES mapping and assessment methods

Welcome to the Ecosystem Services Mapping and Methods database

On this website you can explore the ESMERALDA methods database. The Purpose of this database it to collect the majority of available methods to map and assess ecosystem services. Its aim is also to link those methods to specific ecosystem types as well as ecosystem services.

This website is still under development. Functionality might change, be removed, or added without prior notice.

Which questions drive the Mapping and Assessment of Ecosystems and their Services under Action 5 of the EU Biodiversity Strategy?

▼ Joachim Maes, Inge Liekens, Claire Brown

Abstract ▲

Action 5 of the European Union's Biodiversity Strategy to 2020 asks that Member States map and assess the state of ecosystems and their services in their national territory. Policymakers and stakeholders of these countries frequently ask why this work is necessary. This article shows that this question can be broken down into a number of specific questions which, in turn, bring specific requests for knowledge and guidance to the surface. This paper develops a typology of questions and identifies the following five categories: knowledge requests, policy support questions, questions on resources and responsibilities, application questions and technical and methodological guidance questions. Next, this typology of questions is framed in an adaptive policy cycle and coupled to a set of available solutions.

Keywords ▲

ESMERALDA's impact on policy and decision making

Example questions:

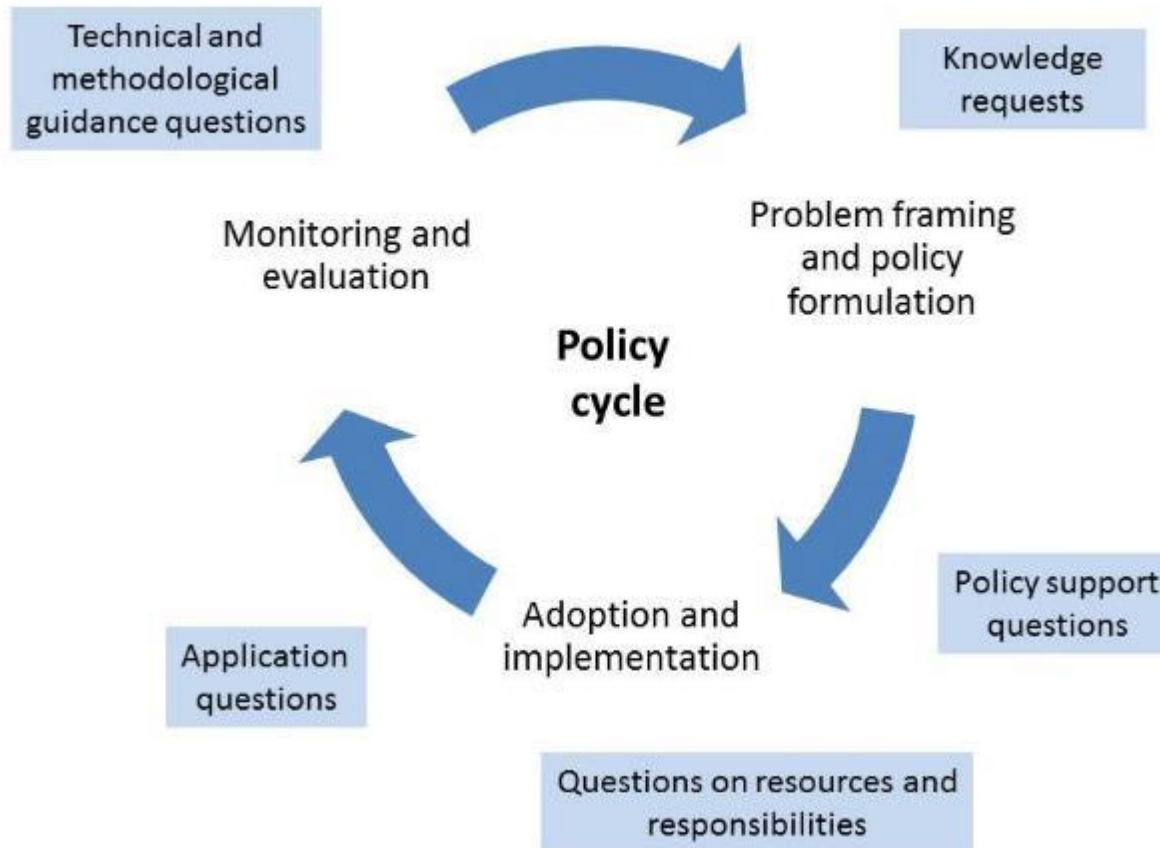

- ★ *How can the ecosystem service concept be made relevant and find its entry into the development of the next CAP?*
- ★ *What are ecosystem services farmers could be paid for?*
- ★ *What is the public's current understanding of ES?*
- ★ *Do people have preferences for heathland restoration or river restoration?*
- ★ *How can the ES approach be integrated into planning and EIA processes?*

Questions were grouped into 5 categories:

1. Knowledge requests
2. Policy support questions
3. Questions about resources and the governance of implementation of ecosystem services based approaches
4. Applications
5. Technical and methodological guidance questions

In a next step, these questions can be linked to identified ecosystem service mapping and assessment methods.

ESMERALDA's impact on policy and decision making

ESMERALDA policy questions that drive MAES placed along a policy cycle

(Maes et al. (2018) – *One Ecosystem*)

The **ESMERALDA** bottle!

- ★ Had to travel from Workshop to Workshop!
- ★ To be filled with something typical from your region/country

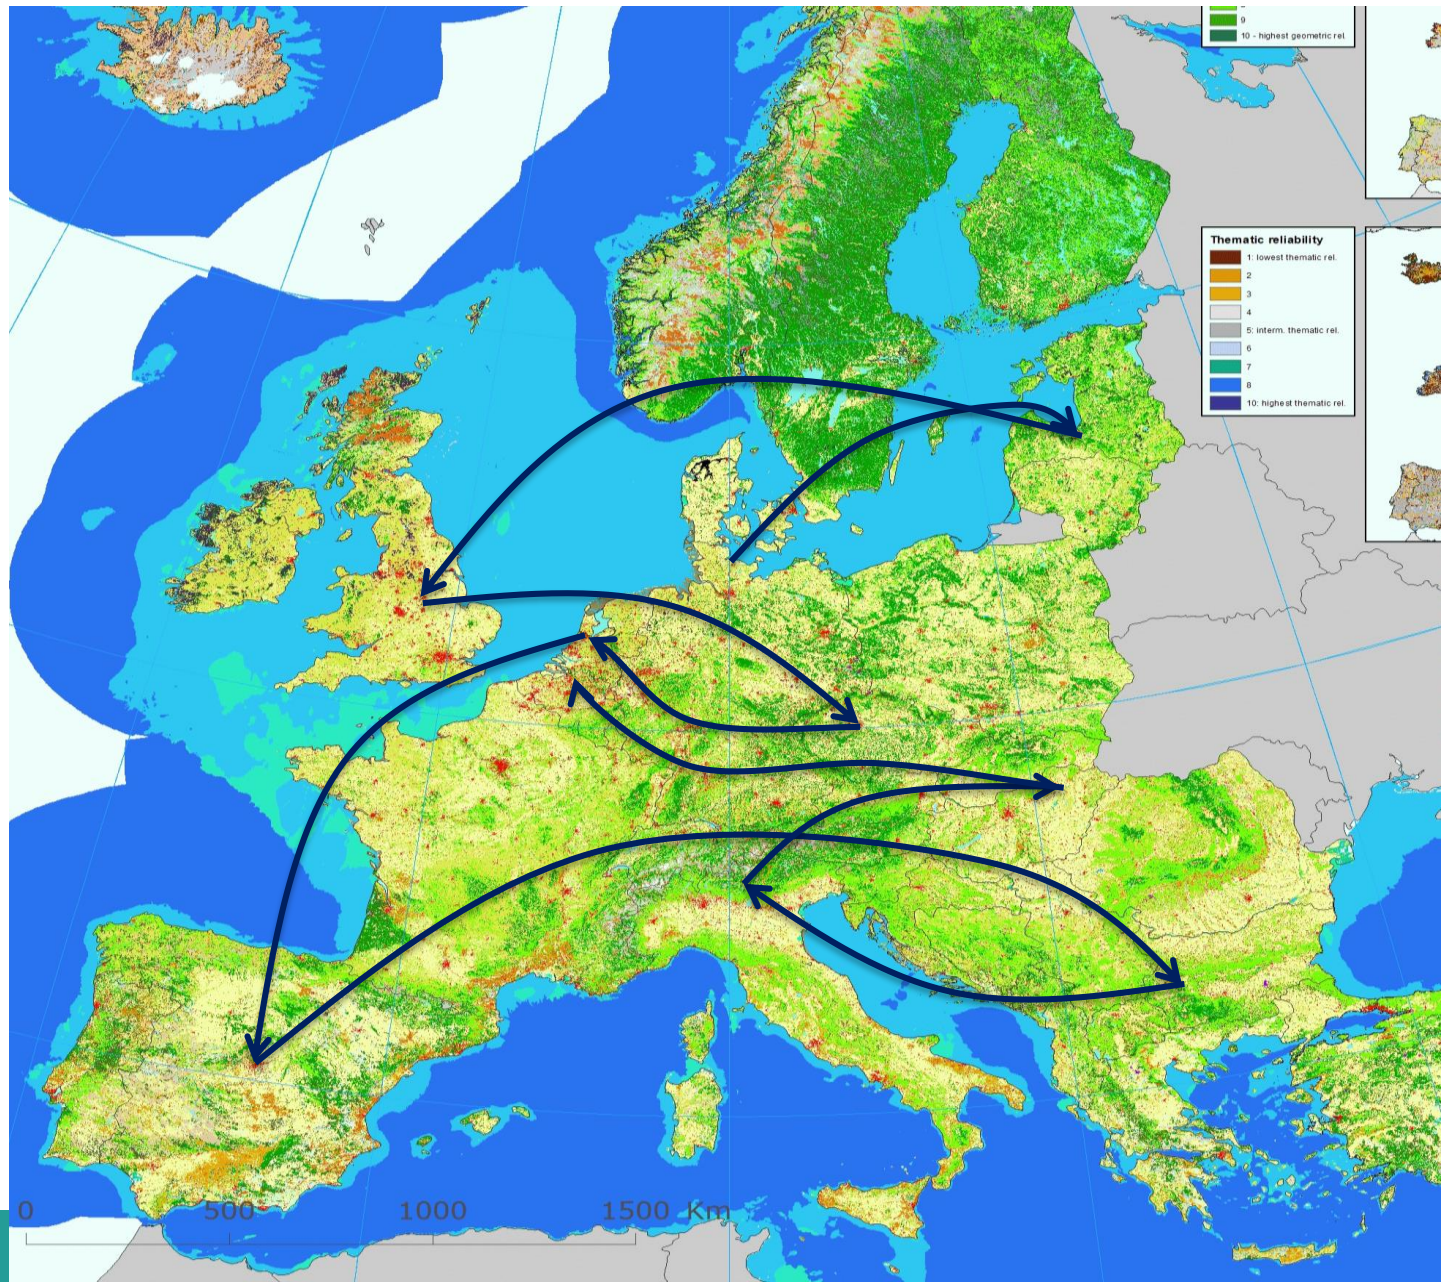

ESMERALDA itinerary

ESMERALDA itinerary

https://biodiversity.europa.eu/Plone/maes/mapping-ecosystems/map-of-european-ecosystem-types/map_ecosystem_types_2006_v21_75dpi.gif

What will come after ESMERALDA will end in July 2018?

ESMERALDA products' maintenance

- ★ ESMERALDA MAES Explorer available via ESP, OPPLA and BISE
- ★ ESMERALDA MAES Methods Explorer will be available for follow-up projects
- ★ ESMERALDA Open access publications (e.g. textbook, One Ecosystem) will be available

ESMERALDA network maintenance

- ★ Difficult to keep such high level of activity, support would be needed
- ★ ESP national and regional Chapters will provide support and technical infrastructure

ESMERALDA follow-up projects

- ★ **MOVE** (Facilitating MAES to support regional policy in OVerseas Europe: mobilizing stakeholders and pooling resources)
- ★ **MAIA** (Mapping and Assessment for Integrated ecosystem Accounting); EU Call on Valuing nature: developing and implementing natural capital and ecosystem accounts in EU Member States and Associated Countries (SC5-18-2018)
- ★ ... hopefully further opportunities in future

**Thanks for listening, for great co-operation
& enjoy the Conference!**
